

DCT 553P

Industrial Pressure Transmitter with IO-Link Interface

Process Connections with semi-flush
ceramic diaphragm

accuracy according to IEC 60770:
Standard: 0.35 % FSO
Option: 0.25 % FSO

Nominal pressure

from 0 ... 40 mbar up to 0 ... 20 bar

Output signal

- IO-Link according to specification V 1.1
- data transfer rate 38.4 kbit/sec
- smart sensor profile

Special characteristics

- hygienic version
- high purity ceramic 99.9 % Al₂O₃ diaphragm
- high overpressure capability
- ingress protection IP 67 / IP 69

Optional versions

- different process connections

The pressure transmitter DCT 553P is used in the food and pharmaceutical industries or in applications where a dead space-free process connection is required. A capacitive ceramic pressure sensor developed in-house is used as the basic sensor, which is characterized by a high overload and excellent surface quality.

The special design prevents the condensation inside the pressure transmitter and thus failure in applications with large temperature changes.

The integrated, standardised IO-Link interface increases productivity and supports the operator in service and maintenance.

Preferred areas of use are

Food industry

Chemical and
petrochemical industry

Material and test certificates

- inspection certificate 3.1
according to EN 10204
- test report 2.2
according to EN 10204
